Response:

What was new to me was the history of Java. I did not know that it was owned by Oracle and that it was created in 1995. Making Java the same age as I am. I was aware of the concept of commenting in Java and how that was done and when. I am not too confident with Java in general so I would say in all honesty all the topics are still a concern for me. Especially being that I did not do too well in CS 113, but I am willing to still work hard.
